

### REMARKS

Claims 1-20 are in this application and are presented for consideration. By this amendment, Applicant has amended claims 13-15 and 18.

The Office Action states that the title of the invention is not descriptive.

Applicant has amended the specification as shown above to provide a new title that is clearly indicative of the invention to which the claims are directed. Applicant respectfully requests that the Examiner enter the title as now presented.

The drawings have been objected to under 37 CFR 1.83(a) because the Office Action states that the drawings fail to show details of strip conductors as set forth in claim 15.

Applicant wishes to thank the Examiner for speaking with one of Applicant's representatives, Brian Duncan, on April 21, 2009 regarding this issue. During the conversation with the Examiner, Applicant's representative stated that Figure 3 shows the electric wires designed as strip conductors that extend within the printed circuit board 15. The Examiner agreed with Applicant's representative's position and stated that paragraph [0031] of the specification should be amended to provide that the electric wires 14 can be designed as strip conductors. As such, Applicant has amended paragraph [0031] of the specification as shown above to provide that the electric wires 14 are designed as strip conductors. Accordingly, Applicant respectfully requests that the Examiner remove the objection to the drawing.

Claims 13-15 have been objected to because of minor informalities.

Applicant has amended claims 13-15 to address these issues. Applicant wishes to thank the Examiner for the careful review of the claims. It is Applicant's position that the application

is now in condition for allowance. However, the Examiner is invited to contact one of Applicant's representatives at the telephone number listed below should there be any outstanding issues remaining.

Favorable consideration on the merits is requested.

Respectfully submitted  
for Applicant,
